

CLEAN ENERGY INVENTION ACTIVITY

Grade Level:	ANY (adaptable)	Name:	
Time:	45 minutes - 1 hour		
Materials:	Basic drawing supplies		
Description:	Participants draw or design a product, invention or adaptation that incorporates clean energy. The group discusses.		cleanenergyfun.com/learn free to use for educational or entertainment purposes

What do you think would be a cool product, invention or use for clean energy?

Draw your idea and describe your invention by answering the questions below. You can use any form of energy imaginable and there are no other restrictions, so be creative! Discuss in groups afterwards, club members can then vote on the most creative invention and the most helpful invention.

Answer the following questions about your invention

What problem or need does your invention help with?

How does it work?

What is your favorite part or feature of your invention?

Other questions about your invention:

Who would benefit?

What challenges would you have making it?

How would you distribute it?

How could each invention be improved?

How many people would it take to make your invention?
